OF THE
UNIVERSITY OF ILLINOIS

THE
ANNUAL ANNOUNCEMENT
OF THE

LOUISVILLE
MEDICAL COLLEGE,
LOUISVILLE, KY.

SESSION OF 1874-75.

NOTICE.—Under the efficient supervision of Mr. H. P. McDonald, Architect of this city, the College Building has been enlarged by the construction of a handsome Mansard roof. In this enlargement 200 students can dissect at the same time.

Board of Trustees.

HON. WM. PRESTON, PRESIDENT.

HON. JOHN M. HARLAN, VICE PRES.

B. M. WIBLE, M. D., SECRETARY.

E. HUTCHINGS,

H. S. MOSS,

W. O. DODD,

W. B. FLEMING,

LYTTLETON COOKE.

Faculty.

HENRY M. BULLITT, M. D.,
Prof. of Physiology and Public Hygiene,
President of the Faculty.
Walnut and Fifth.

E. S. GAILLARD, A. M., M. D.,
L.L. D.,
Professor of Principles and Practice of Medicine, and General Pathology, and
Dean and Treas. of the Faculty.
Second, between Green and Walnut.

JOHN A. OCTERLONY, M. D.,
Professor of Materia Medica and Therapeutics and Clinical Medicine.
Fourth, between Walnut and Chestnut

JOHN GOODMAN, M. D.,
Professor of Obstetrics.
Third between Chestnut and Walnut.

C. S. FENNER, M. D.,
Clinical Lecturer on Diseases of the Eye.
Third street near Walnut.

R. C. BRANDEIS, M. D.,
Clinical Lecturer on Diseases of the Ear and Larynx.
Third street near Broadway.

J. A. IRELAND, M. D.,
Professor of Diseases of Women and Children.
Maison, between Jackson and Preston.

J. M. KELLER, M. D.,
Professor of Principles and Practice of Surgery and Clinical Surgery.
Green, between Second and Third.

J. W. MAXWELL, M. D.,
Prof. of Medical Chemistry and Toxicology
Next door to Blind Institute.

C. W. KELLY, M. D.,
Professor of General and Surgical Anatomy and Regent of the Faculty.
Second, between Green and Jefferson.

GEORGE J. COOKE, M. D.,
Demonstrator of Anatomy.
Market and Twentieth.

E. VON DONHOFF, M. D.,
Prosector to the Chair of Anatomy.
Jefferson near Brook.

D. F. POWELL, M. D.,
Janitor.
College Building.

NOTICE I.—The Faculty have secured a valuable collection of German and French papier-maché models of all of the large joints; the brain; eye; larynx; ear; lungs; heart; the abdominal and pelvic viscera; the gravid uterus in each month of gestation, together with the fetus and its membranes; also a fine collection of enlarged colored drawings—anatomical, medical, obstetrical and surgical. These collections increase largely the advantages of the student throughout the course.

NOTICE II.—Messrs. John P. Morton & Co. offer a valuable set of books for the best thesis on Materia Medica and Therapeutics.

THE Louisville Medical College.

The next regular session of the LOUISVILLE MEDICAL COLLEGE will commence on Thursday, October 1st, 1874, and terminate in the last week of February, 1875. The Faculty will give a gratuitous Preliminary Course of Lectures, didactic and clinical, commencing on the second Monday of September. This course will consist of lectures upon subjects of an elementary and introductory character, such as cannot be given in the regular course, but such as will prove of great value to the student, and enable him the better to appreciate the subsequent lectures of the official term.

The public lecture introductory to the regular course will be given on Thursday evening, October 1st.

Spring Course.

The Spring course of lectures commences on the first Monday in March and closes in the last week of June. This is not a "graduation course." The Spring course has become a great favorite with students, who testify generally that it is fully as instructive to them as the Winter course. The regular Faculty of the College constitute the Faculty of the Spring course.

Success of the College.

The friends of the College have been extremely gratified at its surprising success. The College was organized with the avowed object of demonstrating that the public would support a Medical Institution which competes with the first class colleges of this country, not by underbidding them in their fee-rates, but by making efficient and laborious teaching the basis of competition.

Kentucky has demonstrated, in times past, when four hundred students annually assembled in her great Medical Institutions, that she can, with the generous and appreciative aid of her surrounding sister states, sustain a Medical College equal in classes and reputation to the best medical institutions in America. This was done, not by resorting to a charge of a third only of the fee-rates required by the best medical colleges of the country, but by proving that the fidelity of an efficient

Faculty is all that students demand; that when this is secured to them, their pride of section and of state is such as to make them extend a full support to their own colleges; paying these, in preference, the same fees that are demanded by distant institutions.

This college was organized on this basis alone; to show, in brief, that medical schools in Kentucky, in the great and prosperous valleys of the Ohio and Mississippi are not always compelled to purchase a class in order to obtain one; for when a student, who would be required to pay one hundred and twenty or one hundred and forty dollars at the best schools in the United States, is given a full set of tickets for fifty dollars by the cheap-fee schools of the West and South, such schools purchase a class, by giving each student the difference between one hundred and twenty, and fifty dollars; that is, by purchasing a class at the rate of seventy or ninety dollars given for each student. These statements are made courteously, but plainly. The facts are palpable and undeniable, and this statement of them is made without circumlocution or evasion. Of course when medical schools are endowed this statement is not applicable to them; but there is no endowed medical institution now in operation in this city, or in this immediate section of the country.

The Faculty do not assume that the same course of lectures would be less valuable if given for fifty dollars than if it were delivered for one hundred and twenty dollars, but they do state that the lectures now given in the best colleges of the United States for one hundred and twenty dollars would not and could not be given for fifty dollars; the gentlemen composing such Faculties, those who give character and position to these schools, would not hold their professorships if they were required to give what is now given by them for one third of the remuneration they now receive. They place too high an estimate upon their time and services to surrender these for such remuneration. They would resign, and their places would be occupied by a different class and order of teachers. To secure, therefore, a competent corps of teachers they must be adequately remunerated. The principle recognized and admitted in mercantile and commercial circles—a principle undeniably true throughout the civilized world—is, that cheap prices usually imply inferior articles. This principle is equally true in medical education; and if students expect to be well taught, they must pay a price that will remunerate their teachers.

In addition to these self-evident facts, it is logically true, that just in proportion as the attainment of the medical diploma is made less expensive, so will the number seeking it be increased. Such a result over-crowds the medical field; increasing competition; diminishing fees and emoluments; experience, judgment, and skill; compelling physicians to resort to supplemental means of support; diminishing thus their opportunities for study, depreciating their professional status before the com-

munity; and rendering them less skilled, less valued, and less respected. Every physician, present and prospective, is interested in these results; and if he desires competition with him to increase, while his remuneration, practice, judgment, skill, and general value in the estimation of the public must necessarily diminish, he has only to aid in increasing the number of physicians, by aiding and supporting this new system of cheap-fee schools. In further addition to these reasons, students are particularly interested in this fact, that the diplomas of cheap-fee schools do not and cannot command the respect, either in America or Europe, that is accorded to schools whose policy in regard to fees has secured them able Faculties and admitted distinction.

Lastly, it cannot be believed that students are disposed to ask a medical education and to give to their teachers fees less than those given by students to their teachers in Virginia, the Gulf States, and those sections that were ruined and made desolate by the war.

These reasons are submitted by the officers of this college in justice to themselves, and with entire confidence in the judgment and pride of physicians and students. The Faculty have carefully reflected over the difficulties of contending alone with the cheap-fee schools of the West and South; but they do so with the firm conviction, unchanged and unchangeable, that physicians and students will fully sustain a medical college which is struggling to regain for this portion of America the high position which it once enjoyed for its medical schools. Cheap fee schools admit that their course is wrong; and their history is demonstrating that it is ruinous to themselves and their profession. They are becoming more and more dissatisfied with their course, and are really ashamed of it: anxious all of them to return to the higher fees they formerly required, and the higher positions they once enjoyed.

Policy of the College,

Based upon Experience.

That the officers of this college have not overestimated the pride and sound judgment of physicians and students is clearly evident by the record of this college during the past year. This record shows that while many of the Western colleges were charging, some one-half, some one-third rates and some even less, that this college, charging (to all not certified to be impoverished) the rates demanded by the oldest institutions of the east could secure such a class as is published in this Announcement.

While these charges have been made and will be made in future, the officers of this college fully appreciate the distresses created by the late war, and they have made for this condition full and appropriate provision; this is evident in the practical benefits of their

Beneficiary Scholarships.

In accordance with a right conferred by the charter of this College, the Trustees have created a number of beneficiary Scholarships, all of which entitle their recipients to attend as many courses of lectures as they may desire, enjoying in every one of these courses the same privileges and advantages as are accorded to all other students of the class.

Students seeking to obtain the great privileges and advantages of these scholarships, must bring proper credentials; such credentials being as follows: The applicant for the scholarship allotted to the Senatorial or Representative District in which the applicant resides, must bring an official certificate from the Senator or Representative of that district, stating explicitly that the student is pecuniarily unable to obtain a medical education, and that he is worthy of the aid which is thus extended to him. Where it is impracticable or personally disagreeable for a student to seek or receive such a certificate, the student must apply in writing to the Dean for a scholarship, sending the testimonials of three physicians in good standing as to his character, education and pecuniary condition. Upon the receipt of such testimonials, the Board of Trustees will confer the scholarship upon the applicant. A Beneficiary Scholarship is worth to each student receiving it \$90 at least for every course of lectures, and the appointment is perpetual.

In compliance with the provisions of the time-honored Hippocratic oath (administered to all the graduates of this college, before they are allowed to receive their diplomas) the sons of physicians are not charged any fee whatever for the professors' tickets of this Institution, each one of them being accorded a Beneficiary Scholarship. The sons of the clergy are allowed the same privilege.

An Important Reply.

It is said by many connected with the cheap-fee system in medical schools, that the beneficiary provision in this college is but the adoption of cheap fees in disguise. The answer is simple and conclusive. Should not every college make some provision for those who, from misfortune, are unable to pay the full fees of the institution? If students are received at rates less than the full rates required, is it not better that this should be done by an equitable public provision for this purpose, than that a Faculty should publicly pretend to receive students for a fixed sum, while secretly it takes them at all possible rates, and yet timidly conceals the fact?

As to the ingenious device, recently adopted by some medical colleges, of giving what is termed a gratuitous course of instruction, while each

student is made to pay from twenty to thirty dollars for his matriculation, this is simply disreputable. It is a sham, if not a fraud.

That the Louisville Medical College will receive students who have the misfortune to be poor, at less than its full rates, is openly stated; it does this openly, however, through a just and equitable provision for the purpose, while other schools do likewise, but unfairly and timidly conceal their act. Poor, but deserving young men there will always be, who are striving to obtain a medical education; to all such, this college publicly extends the advantages of the beneficiary provision which it has made for their especial benefit.

Beneficiary Relations Private.

Students obtaining these beneficiary scholarships will enjoy all the privileges and advantages of the college, and their beneficiary relations to the institution will be known only to the Dean of the Faculty.

Hospital and Clinical Advantages.

Students at this college will enjoy all the rights and privileges of students at other schools in all that appertains to the hospitals and public charities of the city.

"Louisville now claims a population of 150,000, which affords a large supply of material for clinical instruction. The city with laudable generosity has greatly enlarged the Louisville City Hospital by the addition of two large and handsome wings, containing a new Amphitheatre, Male and Female wards, a Lying-in ward, and an Ophthalmic ward. To this Institution the student has access twice a week, to hear clinical lectures, see post mortem examinations, and witness surgical operations."

Facilities for Dissecting.

Anatomical material will be furnished in ample quantity, and students may rely upon the Demonstrator for securing to them every facility and advantage in the prosecution of their anatomical studies.

College Building.

During the present summer the lower Lecture Hall of the College, formerly unpleasantly crowded, has been so enlarged as to accommodate four hundred and fifty students. This Hall has been entirely refitted and furnished with chairs, and students will find it, in comfort and convenience, superior to that of any medical college in this country. The dissecting rooms have been so arranged that the morbid effluvia from them cannot enter any of the lecture rooms. In addition to this the large Amphitheatre is thoroughly warmed and ventilated, and the

class may rely upon the enjoyment at all times, in the lecture rooms, of a pure and well warmed atmosphere ; with the maintenance of thorough hygiene. The Faculty have re-leased the college building, with the privilege of renewing this lease for a long period of years. The stability and permanency of this college are thus secured.

Recent Improvements.

In addition to enlarging the lower Lecture Hall to a capacity of 450, and furnishing it with that number of comfortable chairs, a handsome Mansard Roof has been placed upon the building, affording space in which 300 students can dissect at the same time. Daily clinics of one hour each, commencing at 8 A. M., will be given in the College on the following branches : Surgery, Practice, Diseases of Women, of the Eye, Ear and Larynx. The Faculty also offer the advantages of their new Dispensary, established near the College.

Prizes.

For the best standing in all the branches, a gold medal. Hereafter all competitors for this medal will be examined by each member of the Faculty in the presence of the entire Faculty convened for this purpose. The Faculty, thus fully informed, will be the arbiters in determining the proper recipient of this high honor ; the first honor of the College.

For the best thesis, a silver medal.

For the best anatomical specimen, a silver medal.

Professor Octerlony offers for the best standing in *Materia Medica* and *Therapeutics* suitable prizes ; open to students of all colleges.

Professor Keller offeres a prize of a complete Minor Operating Case for the best standing in Surgery. Students of all colleges are invited to compete.

Professor Kelly offers a prize of a fine case of Surgical Instruments to the student passing the best examination in Anatomy. Students of all colleges are invited to compete.

Professor Gaillard offers to the student whose standing is best on the Practice of Medicine Trousseau's great work on Clinical Medicine, in four volumes. The students of all medical colleges may compete for this prize. The committee to assign the prize will be unconnected with any medical college.

The Honorable Wm. H. Grainger offers a prize of fifty dollars in gold for the best report of Professor Octerlony's Clinical Lectures at the Louisville City Hospital.

Mr. Simon Jones, Druggist and Pharmaceutist, Jefferson and First streets, Louisville, Kentucky, offers a handsome case of Amputating Instruments to the student who stands first in Anatomy. Students of all colleges are invited to compete for this prize.

Examinations.

Several of the Faculty propose to devote a portion of each day to examinations, written or oral, on the subjects of past lectures. This will tend to impress such subjects more indelibly upon the memory, and will familiarize students with the practical details in regard to important subjects.

The Professor of Surgery will require all second course students to operate before the class upon either patients or the cadaver.

Inaugural Exercises.

On the evening of the Inaugural Exercises one of the class will deliver the salutatory address—the orator to be selected as the Faculty may determine.

Commencement Exercises.

In addition to the usual addresses on this occasion, a Salutatory and a Valedictory will be delivered by members of the graduating class, the orators being elected by the whole class, on the last Saturday of January.

Text Books.

MEDICAL AND SURGICAL DISEASES OF WOMEN.—Simpson's Clinical Lectures on the Diseases of Women; Bennett on Inflammation of the Uterus, &c.; Thomas on Diseases of Women.

HYGIENE.—Dickson, Williams.

PRINCIPLES AND PRACTICE OF MEDICINE.—Watson's Practice; Tanner's Practice; Aitkin's Practice; Robert's Practice; Flint's Practice; Niemeyer's Practice.

MATERIA MEDICA, THERAPEUTICS AND CLINICAL MEDICINE.—Wood's Therapeutics and Pharmacology; Stille's Therapeutics and Materia Medica, Pereira's Materia Medica and Therapeutics; United States Dispensatory; Bennett's Clinical Medicine; Barth and Rogers' Manual of Auscultation.

OBSTETRICS.—System of Obstetrics, by Henry Miller; Meadow's Obstetrics; Leishman's Midwifery.

PRINCIPLES AND PRACTICE OF SURGERY.—Ashurst; Erichsen; Chelius; Velpeau; Cooper; Holmes; Syme; Bryant.

DISEASES OF WOMEN AND CHILDREN.—Hewitt; Thomas; West; Tanner.

CHEMISTRY AND TOXICOLOGY.—Fowne's Chemistry; Brande & Taylor's Chemistry.

ANATOMY.—Gray, Wilson, Cruveilhier.

PHYSIOLOGY.—Flint, Marshall, Carpenter, Dalton.

Fees.

In conformity with the fees required by many of the best medical institutions in America, the fees of this College will be as follows :

Matriculation Fee,	\$5 00
Professors' Tickets,	120 00
Dissection,	10 00
Graduation,	36 00
Beneficiary,	30 00
Spring Course,	25 00

The city requires a payment of five dollars for attendance upon the Clinical Lectures at the Louisville City Hospital from students of all medical colleges in this city. This fee is paid to the hospital.

Fees, as in all colleges, are payable strictly in advance.

No student will be allowed to matriculate, if in the opinion of the Faculty his preliminary education is insufficient to enable him to enter upon the study of medicine.

Louisville City Hospital.

The graduates of this College have the privilege of becoming candidates for the position of resident graduate at the Louisville City Hospital. These positions are secured by competitive examination, before an impartial Board of Physicians. At the last examination three of the four positions to be filled were awarded to graduates of the Louisville Medical College. The same result has occurred for three previous and successive years.

Requirements for Graduation.

1. The candidate must have attended two full courses of lectures, the last of which must have been in this Institution. The spring course of lectures in this college will not be regarded as a full or official course.

2. A reputable practice of four years, succeeding a regular course of study, under a Doctor of Medicine, will be deemed equivalent to a first course of lectures.

3. The candidate must have taken the Demonstrator's Ticket for at least one session.

4. He must have attended one course of Clinical Instruction in the Louisville City Hospital.

5. He must have written a thesis of not less than sixteen pages on some medical subject.

N. B. The graduation fee must be handed to the Dean at the time that the thesis is offered. No exception will be made to this rule. The voting will be by ballot, after a private examination of each candidate.

In the event of his rejection, the thesis and graduation fee will be returned to him.

If, after examination for the degree, the candidate, on ballot, shall be found to have received four negative votes, he will be entitled to another examination. Should he decline this, he may withdraw his thesis, and will not be considered as rejected.

The degree will not be conferred upon any candidate who is often absent from the regular lectures of the College, or who absents himself from the public Commencement without the special permission of the Faculty.

Private Instruction.

In accordance with the custom now generally adopted in the best medical colleges of America and Europe, there will be several private classes organized and instructed in this Institution. As a matter of course the tuition fees for such private and additional teaching will (as is the case in all colleges) be separate and distinct from the regular fees of the College. It will be entirely optional with students whether or not they become members of these private classes.

On Arrival.

Students are particularly advised, for their own interests and protection, to proceed at once to the College building, on Green street, corner of Fifth, where full information will be given by the Janitor, Dr. D. F. Powell, in regard to the prices of board, boarding-houses, etc. Good board may be obtained at from \$4 50 to \$5 00 per week.

The Faculty earnestly advise students to matriculate as early as possible, for the following reasons: 1st, There is not any danger in visiting Louisville, as there is in visiting the cities of the Gulf States, before the appearance of cold weather. 2nd, There is a serious disadvantage to all students who join the class late in the session, as those lectures will already have been delivered, the full comprehension of which is necessary to a clear apprehension of the subsequent lectures of the course. Students are earnestly advised, therefore, to join the class as early as possible. They will find it much to their advantage to attend the preliminary and gratuitous course, which begins on the second Monday of September.

For further particulars apply to

E. S. GAILLARD, M. D.,

DEAN,

163 Second Street, between Green and Walnut, Louisville, Ky.

Commencement.

At the Commencement Exercises, held on the 28th of February, 1874, the following prizes were awarded as testimonials of merit:

The first prize, a gold medal, was awarded to Dr. W. M. Holt, Kentucky, honorable mention being made of Dr. O. M. Humston, Kentucky, his immediate competitor.

A silver medal was awarded to Dr. E. T. Easley, of Mississippi, for the best Thesis, honorable mention being made of Drs. A. S. Holmes, Mississippi; L. J. Randall, Texas, and J. Q. Thomas, Kentucky.

A silver medal was awarded to Dr. W. S. Holliday, Illinois, for best specimen of Comparative Anatomy.

Professor J. A. Ochterlony offered a prize for the best standing on his lectures. This was awarded to Dr. W. T. Chandler, Kentucky, honorable mention being made of Dr. R. S. Seeley and A. G. Osterman, of Kentucky.

Professor J. M. Keller offered a prize for the best standing on the Principles and Practice of Surgery. This prize, a case of Surgical Instruments, was awarded to Dr. A. S. Holmes, Mississippi, honorable mention with similar prize being made of Dr. E. T. Easley, Mississippi.

Professor C. W. Kelly, offered a prize for the best standing on Anatomy. This, a case of Surgical Instruments, was awarded to Dr. O. M. Humston, of Kentucky.

Professor Holloway awarded his prize to Dr. W. S. Holliday, of Illinois for the best prepared notes on Clinical Surgery.

Professor E. S. Gaillard presented a silver medal to Dr. W. T. Chandler, of Kentucky, for the greatest proficiency in the Principles and Practice of Medicine, honorable mention being made of Dr. J. Q. Thomas, of Kentucky.

Dr. W. B. Matthews, of Georgia, delivered the Salutatory.

Dr. J. T. McKenzie, delivered the Valedictory in behalf of the class.

Professor J. A. Ochterlony delivered the Valedictory in behalf of the Faculty.

Judge Bruce delivered a eulogy upon Dr. H. Miller.

while living, and lamented in death by his Profession,
his city, his country, and State.

Born in Glasgow, Ky., November 1st, 1800.

Died in Louisville, Ky., February 8th, 1874.

"Mortalitate relictā, vivit immortalitate indutus."

3 0112 105812785

RICHMOND AND LOUISVILLE Medical Journal.

THE LARGEST MEDICAL MONTHLY IN AMERICA.

The American Medical Weekly.

Sixteen octavo pages weekly, making a large volume of eight hundred and thirty-two pages yearly.

E. S. GAILLARD, A. M., M. D., LL. D.,

Professor of the Principles and Practice of Medicine and General Pathology
in the Louisville Medical College, late Professor of General
Pathology in the Medical College of Virginia, in the
Cumberland University, at Nashville, Tenn.,
and in the Kentucky School of
Medicine, etc.

EDITOR AND PROPRIETOR.

THE MONTHLY,

Established January, 1866, has reached its EIGHTEENTH VOLUME; removed to Kentucky by the unanimous request of the Kentucky State Medical Association; it had at that time (April, 1868) a circulation of 600; has now a first-class circulation of 2,200; is sent into almost every State in the United States; is the largest Medical Monthly in America; its contributors are the leading physicians of the whole country.

Terms; five dollars yearly in advance Specimen copies, 25 cts.

THE WEEKLY,

Established July 4th, 1874, will be issued punctually every Saturday. It will be found to be

"AN ABSTRACT AND BRIEF CHRONICLER OF THE TIMES."

TERMS.—Two dollars yearly in advance; specimen copies free.

Subscribers are particularly invited to contribute. None of the attractive promises usually made in Journal announcements will be made here; but the patrons of these Journals are assured that no expense possible, no labor or care will be spared to make them welcome and useful visitors to their supporters. These Journals are both independent and wholly unconnected with any medical college.

Testimonials in large numbers from physicians and Medical Journals could be furnished, but this charlatanism, this quackery of the Press, now so common, cannot be adopted, and it should meet with the unsparing condemnation of every respectable physician.

The editor returns his earnest thanks to the friends and patrons of his Journals, and asks a continuance of their kindness and support.

Letters should be addressed to him at 163 Second street, Louisville, Ky.
